DECLARATION OF MARK S. PELOQUIN

I, Mark S. Peloquin, having personal knowledge of the facts set forth herein, hereby declare and say as follows:

1. On September 25, 2001, the above referenced patent application was filed with the United States Patent and Trademark Office. The named inventors in the application are Michael J. Payne, Karl Allen, Rohan Coelho, and Maher M. Hawash. Inventors Maher M. Hawash and Rohan Coelho are previous employees of Intel Corporation. Prior to filing, each of these inventors was sent a copy of the above referenced patent application, a Declaration, and an Assignment for their execution. Maher M. Hawash and Rohan Coelho have refused to cooperate with the prosecution of the above referenced patent application and have not executed the Declaration or Assignment.

2. After leaving the employment of Intel Corporation, Maher M. Hawash and Rohan Coelho were sent copies of the first draft for the above

referenced patent application as indicated in Exhibit 1. Maher M. Hawash and Rohan Coelho did not provide a review of the first draft of the above referenced patent application.

3. In response to Exhibit 1, Maher M. Hawash sent an email to me dated September 4, 2001 (Exhibit 2) indicating that he would not review the subject patent application unless he was paid on an hourly basis. This request for further compensation on the part of Maher M. Hawash was relayed to Intel Legal counsel Steven Skabrat (Exhibit 1).

4. Intel normally does not pay a patent filing honorarium fee to inventors that are no longer in their employment. However, in this case Intel would pay the honorarium fee if an inventor cooperated with the patent filing process (Exhibit 2). I relayed this information to Maher M. Hawash by telephone during the time period September 5–12, 2001. Maher M. Hawash told me that he would not provide a review of the above referenced patent application, neither would he execute the Declaration or Assignment documents.

5. On September 13, 2001 a letter, a final draft, a Declaration, and an Assignment were sent to Maher M. Hawash as indicated in Exhibit 3. Maher M. Hawash refused to execute the Declaration and Assignment.

6. With regard to Rohan Coelho, the letter, the final draft, the Declaration, and the Assignment documents (Exhibit 3) were sent to the last known address for Rohan Coelho. Rohan Coelho has not returned an executed Declaration and Assignment even after several requests via telephone messages to Rohan Coelho's home phone of (503) 690-8455, as indicated by the Declaration of Monique M. Pearson.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be

true; and further that these statements were made with the knowledge that willful false statements, and the like so made, are punishable by fine or imprisonment, or both, under Section 1001, of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.

DECLARATION OF MONIQUE M. PEARSON

I, Monique M. Pearson, having personal knowledge of the facts set forth herein, hereby declare and say as follows:

1. I am employed by BLAKELY, SOKOLOFF, TAYLOR & ZAFMAN, as a Legal Secretary. My supervisor is Mark S. Peloquin.

2. On August 30, 2001, at the request of Mark S. Peloquin, I sent a first draft copy of the above referenced patent application to inventors Michael Payne, Karl Allen, Rohan Coehlo, and Maher Hawash informing them that a Declaration and Assignment would be sent to them, for their signatures, with the final draft of the patent application prior to filing the application with the United States Patent and Trademark Office (Exhibit 1).

3. We received an email from Maher Hawash, requesting compensation as a prerequisite to participate in further preparation and filing of the above referenced patent application (Exhibit 2).

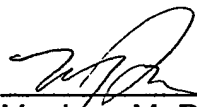

4. At Mr. Peloquin's request, I sent a letter on September 13, 2001 to Maher Hawash; home address of 2642 NE Aurora Drive, Hillsboro, OR 97124 and Rohan Coelho; home address of 14949 NW West Union, Portland, OR 97229, enclosing a copy of the final draft application together with a Declaration pursuant to 37 C.F.R. § 1.63 for their signature via Federal Express Priority Overnight (Exhibit 3). Also included with this correspondence were self-addressed, prepaid Federal Express envelopes to facilitate the return of the executed documents to Mr. Peloquin.

5. When there was no response to said correspondence from Mr. Coelho, at Mr. Peloquin's request, I telephone Mr. Coelho's home on September 21, 2001 and left as message requesting a status of his review of the documents and a time of when we should expect receipt of the signed Declaration and Assignment. Again, there was no response from Mr. Coelho.

6. On September 25, 2001, the above noted patent application was filed with the signatures of Michael Payne and Karl Allen, at Mr. Peloquin's request.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements, and the like so made, are punishable by fine or imprisonment, or both, under Section 1001, of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.

We clearly will not pay any consulting fee to Mr. Hawash (or the others). I recommend that you tell Hawash, Coelho, and Allen that if they review the applications and provide feedback, that Intel will pay them the normal honorarium fee for filing (in this case \$500 for each of them payable AFTER filing). Normally we only pay the honorarium to current employees. However, in this case Intel can pay them to get their cooperation.

If they choose not to participate we shall go forward without them, using available means (uncooperative inventor).

These inventors are not employed by Intel any longer because their business was closed, so there may be some ill will here.

It would be better to get their comments, but proceed without them if necessary.

Subject: Patent Application

Jim,

We have a problem getting sufficient inventor review on the two Intel applications referenced above. There are four inventors on P11780 and three inventors on P12154 broken down as shown below. Intel grouped together multiple disclosures that ultimately formed these patent applications.

P11780: Rohan Coelho, Maher Hawash, Michael Payne, Karl Allen
P12154: Rohan Coelho, Maher Hawash, Michael Payne

So far we have received a review from Mike Payne, he is the only inventor remaining at Intel under employment. Mike suggests that both Karl Allen and Rohan Coelho review the applications. Maher Hawash, another inventor, now requests that he be paid to perform a review.

At one point the inventors who have left Intel were talking about licensing these patent applications from Intel and pursuing this technology on their own.

I have not called any of the Intel inventors who have left Intel yet. How shall we proceed, and if I call Karl or Rohan and they also request payment how shall I handle that situation?

Hi Mark:

I just received the patent application today. I don't work for Intel anymore, and would not be able to review this material for them without proper compensation. I am currently in the process of starting my consulting business and would be willing to review it on that basis. My rate is \$175/hr.

Please let me know if you would like to proceed, or if I should return the material to you.

APPENDIX B

Title 37, Code of Federal Regulations, Section 1.56
Duty to Disclose Information Material to Patentability

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is cancelled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is cancelled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§1.97(b)-(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct. The Office encourages applicants to carefully examine:

(1) Prior art cited in search reports of a foreign patent office in a counterpart application, and

(2) The closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim patentably defines, to make sure that any material information contained therein is disclosed to the Office.

(b) Under this section, information is material to patentability when it is not cumulative to information already of record or being made of record in the application, and

(1) It establishes, by itself or in combination with other information, a prima facie case of unpatentability of a claim; or

(2) It refutes, or is inconsistent with, a position the applicant takes in:

(i) Opposing an argument of unpatentability relied on by the Office, or

(ii) Asserting an argument of patentability.

A prima facie case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability.

(c) Individuals associated with the filing or prosecution of a patent application within the meaning of this section are:

(1) Each inventor named in the application;

(2) Each attorney or agent who prepares or prosecutes the application; and

(3) Every other person who is substantively involved in the preparation or prosecution of the application and who is associated with the inventor, with the assignee or with anyone to whom there is an obligation to assign the application.

(d) Individuals other than the attorney, agent or inventor may comply with this section by disclosing information to the attorney, agent, or inventor.

(e) In any continuation-in-part application, the duty under this section includes the duty to disclose to the Office all information known to the person to be material to patentability, as defined in paragraph (b) of this section, which became available between the filing date of the prior application and the national or PCT international filing date of the continuation-in-part application.
